## **Guidelines on Sustainable Ruminant Feeds and Nutrition Security for Kenya**

---

### **CHAPTER 2 DRIVERS OF FEED AND NUTRITION INSECURITY**

#### **2.10 Migration**

Lack of feeds and water has consistently led the pastoralist migrating with their animals in search of these necessities. Some of the livestock move within or across Counties, in some instances the migration can happen across international borders. Pastoralists near the borders find it easier to cross to the neighbouring countries to fend for their livestock. This migration also leads to conflicts due to competition for resources. Also, there is loss of marketable weight due to loss of body condition as a result of the long walking distances.
