### **Guidelines on Sustainable Ruminant Feeds and Nutrition Security for Kenya**

---

#### **CHAPTER 4 STRATEGIC INTERVENTIONS TO ADDRESS RUMINANT FEED AND NUTRITION INSECURITY**

##### **4.4 Pillar 4. Feed stability**

The interventions to improve the stability of the feed industry include:

##### **4.4.5 Intervention 5. Enabling policy and regulatory environment**

Enabling policy and regulatory environments refer to the legal and policy frameworks that facilitate the operation of the feed industry. The following strategies can promote an enabling policy and regulatory environment

- i. Development of clear and consistent feed regulations and standards that ensure the safety and quality of feed products
- ii. Promotion of feed quality control and monitoring systems to detect and prevent feed contamination and adulteration
- iii. Streamlining of feed import and export procedures to reduce trade barriers and increase market access. Strategic importation of ingredients to cover for the needs of the industry at crucial times. Limiting importation of finished feeds to safeguard our industry.
- iv. Encouragement of investment in the feed industry through tax incentives and other policy measures
- v. Provision of support services, such as credit, extension, and technical assistance, to the feed industry to enhance its competitiveness and sustainability.
